I specialize in animation and hybrid development/design for digital products, driven by creative and user-centered design to empower users in achieving their goals. With a passion for educational topics and a focus on delivering seamless web experiences, I aim to create meaningful products that contribute to the betterment of the planet and humanity. Throughout the past decade, I have worked on diverse projects for non-profit, educational, and cultural organizations, continually enhancing my animation skills and technical expertise.

Experience

→ August 2021 - Present

Frismedia - Frontend Web Designer/Developer

- Collaborated with the lead developer to produce professional websites for various projects.
- Developed apps and websites, focusing on responsiveness, animations, and code implementation.
- Utilized Laravel (Blade) for frontend development for Arriva, a DB subsidiary, and incorporated Alpine JS and Tailwind CSS for micro interactions. I worked on numerous projects, both apps and websites.

→ 2012 - Present

Freelance Webdesigner/Developer - Blackhound

- Created visually appealing and well-designed websites to showcase corporate identities for small and mid-sized businesses.
- Managed and maintained websites for clients, including vercom.nl and asgro.com. Negotiated with stakeholders, sold services, and ensured timely delivery of projects.
- Developed expertise in using WordPress as the primary tech stack, while also incorporating e-commerce solutions like Magento. Strengthened skills in animation, becoming a standout ability.

→ 2013 - 2015

Webdesigner - Think.Brand

At Think.Brand, a startup in Amsterdam, I honed my skills in creating visually appealing websites and developing brand identities. Through this experience, I became proficient in utilizing CSS to deliver captivating designs.

→ 2010 - 2012

Marketing & Communication - Zero-Z-Design
